

Ruby Programming

Applications with Ruby on Rails

Winter Term, 2010

(10 Sessions) Wednesdays 6-9:00 PM, January 13 through March 17

Course Objectives

This course introduces participants to the web development platform of Ruby on Rails. Participants will work on a larger web application project within small teams, using business requirements supplied by the instructor. Topics include:

- Rails application architecture
- RESTful Routes
- Database connectivity and migrations
- Test-driven Development
- Application Deployment
- AJAX

Prerequisites:

Database design and relational database theory; basic SQL; some exposure to web application development and front end technologies; familiarity with Ruby.

Required Textbook:

Agile Web Development with Rails (3rd edition)

PDF version recommended from :

<http://pragprog.com/titles/rails3/agile-web-development-with-rails-third-edition>

Instructor

Jeremy Lightsmith

jeremy.lightsmith@gmail.com

312-953-1193

Technology Requirements:

Laptop w/ Windows XP SP2/Vista or Mac OS X (10.4.x)

Assessment Criteria:

This class is pass / no pass. In order to pass, a student must :

- attend 80% of classes
- being 20 min or more late is considered an absence
- complete 100% of assigned work
- complete a final project
